

FABIAN MÜLLER, PhD

Quantitative Researcher |

Data Analysis, Evaluation & Statistical Modeling

PhD-trained quantitative researcher and analyst with over a decade of experience in data analysis, evaluation, and statistical modeling across academic and applied settings. I use administrative, survey, and experimental data to produce evidence for policy and practice, and explain findings clearly to scientific and applied audiences.

PROFESSIONAL EXPERIENCE

06/2025–Present

Research Associate

LaPsyDÉ, CNRS, Université Paris Cité | Paris, France

- Analyze longitudinal administrative education data from the French Ministry of Education (DEPP), covering approximately 800,000–850,000 student records, to study post-COVID learning trajectories and educational inequality.
- Develop statistical models, including growth models and structural equation models, for cross-cohort analyses, and build reproducible R pipelines.
- Harmonize and integrate data across cohorts, waves, and variables to support robust and comparable analyses.
- Write policy briefs and scientific papers, and present findings at invited talks and conferences for both academic and applied audiences.
- Represent postdoctoral researchers on the laboratory council and contribute to internal lab coordination.

05/2024–05/2025

Research Associate

Laboratoire ACTÉ, Université Clermont Auvergne | Clermont-Ferrand, France

- Managed a research project on inclusive education, special educational needs, and gender in academic evaluation.
- Used experimental methods and analyzed data in R across several studies, with samples up to around 1,500 participants, including data cleaning, multiple imputation, and regression analyses.
- Developed evidence-based recommendations for more inclusive teaching and assessment practices.
- Taught university courses and presented findings in publications and conferences.

10/2019–03/2023

Research Associate

Laboratoire de Psychologie Sociale, Université Paris Cité | Paris, France

- Conducted research on social-class inequalities in higher education, with a focus on cultural mismatch, digital inequality, and student adaptation.
- Designed and analyzed survey and experimental studies across France and Germany, with samples ranging from 1,217 to 2,275 participants, using R and methods such as multi-group CFA, mixed-effects models, and regression.
- Managed national and cross-country projects, secured international funding, and developed collaborations with research partners.
- Published peer-reviewed work, developed evidence-based recommendations, and presented findings at international conferences.

EXPERIENCE CONTINUED

02/2019–12/2019
(freelance)

Scientific Consultant
PROUT AT WORK Foundation | Munich, Germany

- Conducted literature reviews on LGBTQI+ inclusion in workplace and vocational contexts.
- Developed three evidence-based guidelines for employers and contributed to training materials.
- Translated research and policy findings into practical resources for HR and inclusion work.
- Collaborated with stakeholders to support more inclusive workplace practices.

10/2015–08/2018

Research Associate
TUM School of Education (now TUM School of Social Sciences and Technology) | Munich, Germany
Chair for Empirical Educational Research | 05/2017–08/2018

- Contributed to an EU-funded project on inclusion, competence assessment, and teacher training across five countries.
- Conducted a systematic literature review on skills assessment tools covering 13,963 records, which contributed to a peer-reviewed publication.
- Designed and analyzed survey-based research using quantitative and qualitative methods for education- and policy-related questions.
- Coordinated project timelines, international collaboration, resource management, and supervised students and interns.

Centre for International Student Assessment | 10/2015–12/2016

- Worked with transnational educational survey data, including PISA-related research.
- Conducted cross-cultural eye-tracking research in Germany and Taiwan.
- Managed and analyzed complex datasets using SPSS, Mplus, and SMI.
- Collaborated with the national PISA team and international research partners.

03/2013–09/2015

Research Assistant
Chair for Educational and Developmental Psychology, LMU Munich | Munich, Germany

- Conducted behavioral and eye-tracking studies in cross-national research projects.
- Supported project planning, data collection, and quantitative analysis across multiple studies.
- Collaborated with research teams in Japan, France, and Canada.

SKILLS

Software

R (primary)
SPSS
Mplus

Quantitative Methods

SEM / CFA, multi-group & invariance, EFA
Longitudinal, latent growth & growth mixture modeling
Mixed-effects & GLMs
Multiple imputation & missing-data methods

Data & Research

Large-scale administrative, survey, and experimental data
Cross-national and quasi-experimental research
Longitudinal data linkage and harmonization

Research Tools

Qualtrics / LimeSurvey
PsyToolkit
SMI / Tobii Studio
AI-assisted writing and coding workflows

Languages

German (native)
English (C2)
French (C1)

EDUCATION

10/2019–05/2023

PhD in Psychology
Université Paris Cité
Thesis: “Closing the Achievement Gap: Learning from Working-Class Students' Acculturation and Success in Higher Education”

10/2012–09/2014

Master of Science in Psychology
Ludwig-Maximilians-Universität Munich
Clinical Psychology and Cognitive Neuroscience

10/2009–09/2012

Bachelor of Science in Psychology
Universität Regensburg

SELECTED OUTPUTS

- **Müller, F.**, Aelenei, C., & Jury, M. (2026). Teacher bias toward students with special educational needs across student gender. *Teaching and Teacher Education*, 171, 105304.
- **Müller, F.**, Goudeau, S., Stephens, N. M., Aelenei, C., & Sanitioso, R. B. (2023). Social-class inequalities in distance learning during COVID-19. *International Review of Social Psychology*, 36(1), 1–17.
- **Müller, F.** (2025). Le même travail, mais pas la même note. *Le 21 du LaPsyDÉ*. [Policy article]
